Chemical characteristics (at the moment of production)

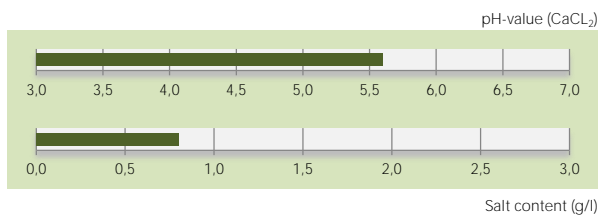

pH-value (CaCl ₂)	5,6
Salt content (g/l)	0,8
N-nitrogen (CaCl ₂)	100 mg/l
P ₂ O ₅ -phosphate (CAL)	100 mg/l
K ₂ O-potassium (CAL)	140 mg/l

Recipe:

101416

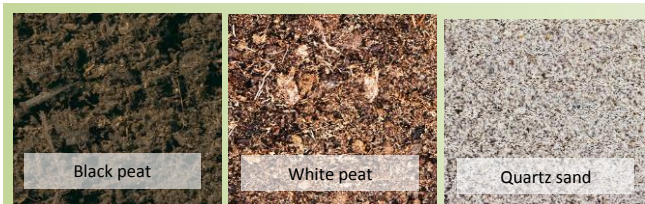

- Peat free
Organic
Peat reduced

Constituents and additives

Effect on the potting soil

Strongly decomposed raised-bog peat (black peat)	increases the water holding capacity and improves the water uptake
Slightly decomposed raised-bog peat (white peat)	increases the air capacity and improves the structural stability
Pure quartz sand	improves drainage and reduces the risk of water logging
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Compound fertilizer	supplies the plants immediately with important macro and micro-nutriens

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
