

BIO FIBROUS GARDEN MULCH

Field of application:

Bio Fibrous Garden Mulch is a peat-free decorative mulch material for maintaining and decorating garden beds and for improving the soil quality in planting areas.

Characteristics (at the moment of production):

Recipe: 115193

total nitrogen (N) %	0,83
total phosphate (P ₂ O ₅) %	0,30
total potassium (K ₂ O) %	0,50
water soluble potassium oxide (K ₂ O) %	0,41
total magnesium (Mg) %	0,13
organic matter (mass.-% fresh matter)	19

- Peat free
- Organic
- Peat reduced

Intendend Purpose / Application:

The material suppresses weeds and protects from erosion and dehydration. The fibrous texture prevents the material from scattering and is thus ideal for ist application in slopy areas.

Xylite

Wood fibres

Compost

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. The raw materials and additives that are used for the product conform to the regulation (EG) No. 834/2007 regarding the ecological/organic production with its regulation (EG) No. 889/2008 for the implementation. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
