## Chemical characteristics (at the moment of production)

pH-value (CaCl <sub>2</sub> )	5,6
Salt content (g/l)	2,2
N-nitrogen (CaCl <sub>2</sub> )	190 mg/l
P <sub>2</sub> O <sub>5</sub> -phosphate (CAL)	280 mg/l
K <sub>2</sub> O-potassium (CAL)	830 mg/l

## Recipe:

108715

- Peat free   
Organic   
Peat reduced

## Constituents and additives

## Effect on the potting soil

Strongly decomposed raised-bog peat (black peat)	increases the water holding capacity and improves the water uptake
Slightly decomposed raised-bog peat (white peat)	increases the air capacity and improves the structural stability
Quality controlled green compost	contributes to the nutrient supply of the plants, stimulates the soil and provides for an optimal water uptake
Natural clay of high sorption capacity	assures a good buffer of nutrients and counteracts fluctuations of salinity and pH-value
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Top-Quality compound fertilizer	supplies the plants immediately with all macro and micro-nutrients
Micro-nutrient fertilizer Floraspur	supplies the plants additionally with micro nutrients
Wetting agent Aqua-Plus	improves the water uptake of the potting soil particularly of the dry material

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. The product has received the RAL quality label according to the regulations of the Gütegemeinschaft Substrate für Pflanzen e.V. (German Quality Assurance Association Growing Media for Plant Cultivation). If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
