Chemical characteristics (at the moment of production)

pH-value (CaCl ₂)	5,2
Salt content (g/l)	1,3
N-nitrogen (CaCl ₂)	250 mg/l
P ₂ O ₅ -phosphate (CAL)	130 mg/l
K ₂ O-potassium (CAL)	320 mg/l

Recipe:

110231

Hint for availability of nutrients:
The nutrients are sufficient for a period of up to six weeks

- Peat free
- Organic
- Peat reduced

Constituents and additives	Effect on the potting soil
Slightly decomposed raised-bog peat (white peat)	increases the air capacity and improves the structural stability
Strongly decomposed raised-bog peat (black peat)	increases the water holding capacity and improves the water uptake
Broken expanded clay	increases the structural capacity of the potting soil for a long time and provides for an optimal air and water flow
Xylite	stabilizes the structure of the potting soil and provides for good root growth by natural humic acids
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Top-Quality compound fertilizer	supplies the plants immediately with all macro and micro-nutrients
Iron chelate fertilizer	supplies the plants sensitive to iron deficiency with good plant available iron

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
