Chemical characteristics (at the moment of production)

pH-value (CaCl ₂)	5,6
Salt content (g/l)	1,8
N-nitrogen (CaCl ₂)	310 mg/l
P ₂ O ₅ -phosphate (CAL)	270 mg/l
K ₂ O-potassium (CAL)	770 mg/l

Recipe:

120549

Hint for availability of nutrients:
The nutrients are sufficient for a period of up to seven weeks

- Peat free
Organic
Peat reduced

Constituents and additives

Effect on the potting soil

Broken expanded clay	increases the structural capacity of the potting soil for a long time and provides for an optimal air and water flow
Slightly decomposed raised-bog peat (white peat)	increases the air capacity and improves the structural stability
Xylite	stabilizes the structure of the potting soil and provides for good root growth by natural humic acids
Quality controlled green compost	contributes to the nutrient supply of the plants, stimulates the soil and provides for an optimal water uptake
Organic wood fibres	loosen and aerate the potting soil and promote rooting of the plants
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Top-Quality compound fertilizer	supplies the plants immediately with all macro and micro-nutrients
Micro-nutrient fertilizer Floraspur	supplies the plants additionally with micro nutrients

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used. If questions occur, please get in touch with your contact person or the technical department of horticulture at Floragard (Tel. +49 441 2092-0).
