## Constituents and additives

## Effect on the potting soil

Pine bark	provides the potting soil with an extra coarse and aerated structure
Coir chips	promote the air capacity of the potting soil and improve the structural stability
Lime (Calcium carbonate)	adapts perfectly the pH-value to the specific requirements of the plants
Top-Quality compound fertilizer	supplies the plants immediately with all macro and micro-nutrients
Guano	organic natural fertilizer assures a natural nutrient supply for a long time

The product should be stored in a dry and cool place and protected against direct sunlight. Our advice would be to use up the product as soon as possible. When stored for a longer period of time, the product should be analyzed before it is used.
